SKILLS & INTERESTS

- Programming Languages and Tools: Java, Python, C, C++, HTML/CSS, Git, JavaScript(Node.js & React), MongoDB and MySQL and Pandas.
- Interests: Web applications, full stack development, cybersecurity, multimedia programming, and user interface design.

PROJECTS

- Genrify: Create random playlist based on user input and add it to Spotify.
 Worked with Node.js and MongoDB in this application. The application was officially deployed in April 2022.
- Personal Website: Portfolio website with personal information, projects and contact information. Designed and maintained by myself. Used HTML/CSS for this project. Created in November 2021.
- Automata: Discord bot that manages the MUN Computer Science Society's server.
 Contributed with several plugins and structure of the bot. Made with nextcord,
 a Python API wrapper. Worked on it in July 2021.
